FlexConnect™
Architectural Linear Lighting System

Flexible LED lighting that can be cut, shaped and reconnected in the field

This is Juno FlexConnect™

Flex it ... cut it, reconnect it!

Juno FlexConnect™ is the industry's most versatile LED linear lighting system. Shape it around curved surfaces, cut it in the field, reconnect individual segments ... no other linear lighting product gives you so many installation options. This is quality, economical architectural-grade linear lighting in a flexible format.

SL Series – Juno FlexConnect™ Indoor Luminaires Damp Location Rated

Indoor SL Series – 12 LEDs per foot produce up to 425 lm/ft from just 4.4W/ft or 225 lm/ft from just 2.2W/ft.

The Juno FlexConnect Architectural Linear Lighting System

Juno FlexConnect™ systems include indoor damp-location luminaires and indoor/outdoor IP67-rated luminaires.

They offer a host of connector accessories that provide unsurpassed application versatility.

The flexible luminaire comes in 20-foot spools that can be field-cut and customized in 6-inch increments, reconnected using the integral connectors, then attached in a variety of configurations including linear channels and curved surfaces. Residential, hospitality, retail, or commercial ... there's no limit to the creative illumination possibilities afforded by the Juno FlexConnect Architectural Linear Lighting System.

SLW Series – Juno FlexConnect™ Indoor/Outdoor Luminaires

IP67 Rated for Wet Locations

Indoor/Outdoor SLW Series – With 12 LEDs per foot, they deliver up to 425 lm/ft from just 4.4W/ft or 220 lm/ft from just 2.2W/ft. Double-populated with 24 LEDs per foot provides more even illumination and up to 450 lm/ft from just 4.8W/ft.

Superior Performance and Quality of Light

Juno FlexConnect™ LED luminaires offer superb lighting performance, producing up to 450 lumens per foot of brilliant white light in CCTs of 2200K, 2700K, 3000K, 3500K, and 4000K.

Onboard Current Regulation – Consistent light output is maintained across the length of the run utilizing current regulators every 6-inches; unlike traditional LED tape that uses resistors which results in voltage drop and light degradation.

Indoor (SL Series, Damp Location)

- 2W/ft. (225 lm/ft.)
- 4W/ft. (425 lm/ft.)
- 12 LEDs per foot

Embedded Connectors – Patent pending, embedded connectors allow Juno FlexConnect to be field-cut in 6-inch increments and reconnected in the field to another strip, electrical feed or connector.

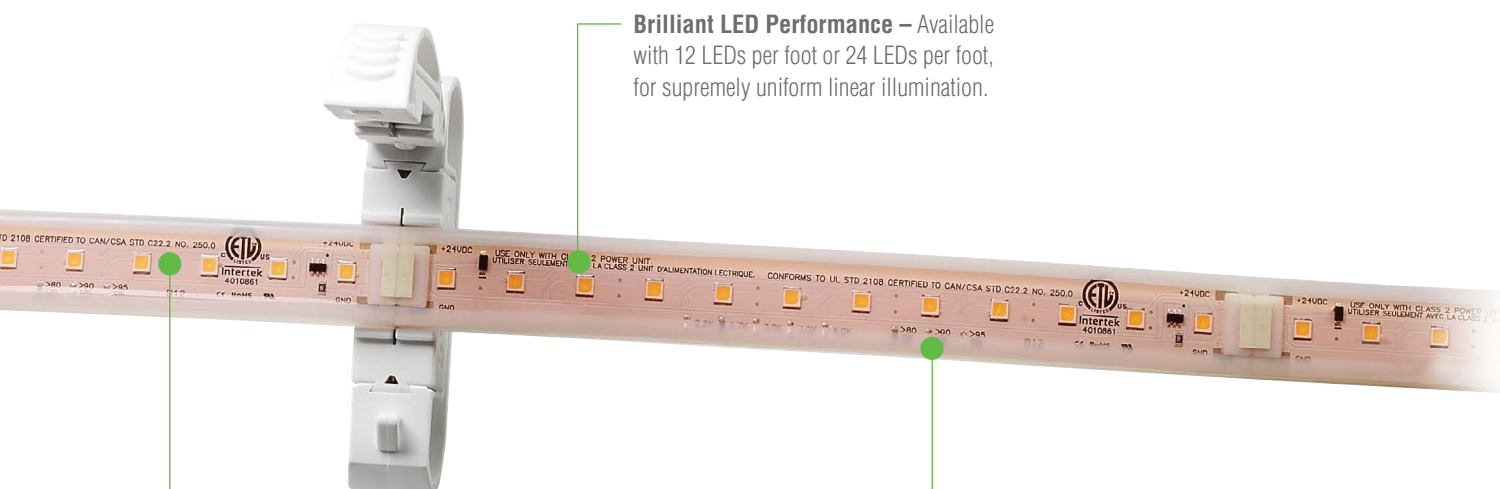

Indoor/Outdoor (SLW Series, IP67 Rated)

- 2W/ft. (220 lm/ft.)
- 4W/ft. (450 lm/ft.)
- 12 or 24 LEDs per foot

Patent Pending Optical Pigment

The proprietary optical pigment utilized in Juno FlexConnect luminaires is truly unique.

This UV-stable pigment maintains color throughout the life of the product and corrects color shift that regularly occurs with other encapsulated strips. CCT color points are maintained within a 3-step MacAdam ellipse, providing the ability to accurately match other architectural lighting within a space. Excellent color rendition is achieved with standard CRI of 80 minimum and CRI of 95 available in the 2700K and 3000K versions. No other flexible linear-lighting system can compare in color and performance to these exceptional luminaires.

Brilliant LED Performance – Available with 12 LEDs per foot or 24 LEDs per foot, for supremely uniform linear illumination.

Up to
95 CRI

Proprietary Optical Pigment – Patent pending optical pigment corrects color shift that results from LED encapsulation. Color point is spot-on as the pigment provides industry leading color rendering and color consistency.

Durable Silicone Encapsulation – UV stable silicon protects the luminaire, providing extended reliability and long life.

Bendable, configurable – Easy to bend, shape, and cut in the field for unrivaled application flexibility.

24VDC power supply – ELV/forward phase and 0-10V dimming; Compatible with nLight® nPP16d. Lutron driver options available.

Juno FlexConnect™

Easy to configure ... easy to install

Supplied in 20-foot spools, Juno FlexConnect™ is the only encapsulated flexible linear luminaire on the market that features unique, integral connectors. Each connector is spaced 6-inches apart, enabling the luminaires to be cut to any length and reconnected in the field. This helps eliminate waste and makes it easy to configure. Linear runs from 1-foot to 40-feet in length are possible with no voltage drop, ensuring even illumination throughout.

Installation couldn't be easier. Simply ... Flex it, Cut it, Reconnect it!

SL/SLW Series Cutting Tool – Make quick, fool-proof cuts through the center of embedded connectors placed every 6-inches along the strip.

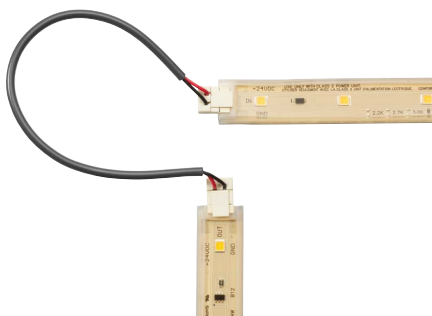

Luminaire strips must be cut using the custom cutting tool (ordered separately).

Electrical Feeds

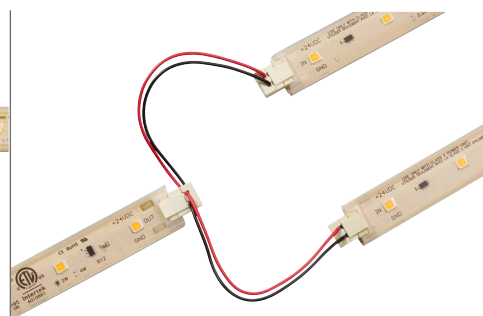

A variety of cables and modular connectors are available to customize each SL and SLW Series installation.

Starter Cables
CL2 rated for in-wall use.

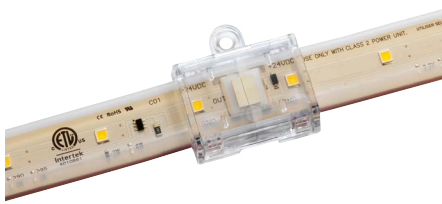

Joiner Cables
Provides a flexible connection for two luminaire strips.

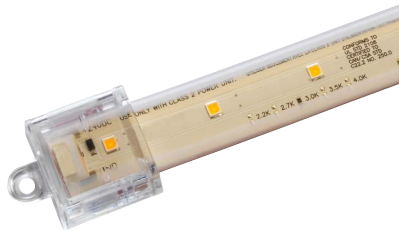

3-Way Connector
Provides a flexible connection for three luminaire strips.

Modular Connectors

End-to-End Connector – SLW Series connector seals two cut luminaire strips.

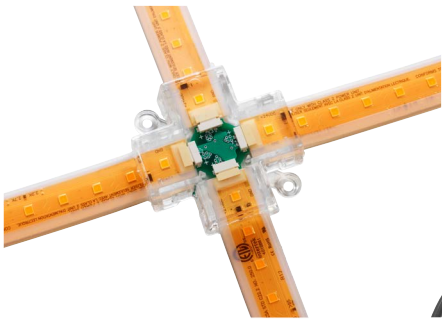

End Cap – Seals cut end of luminaire strip.

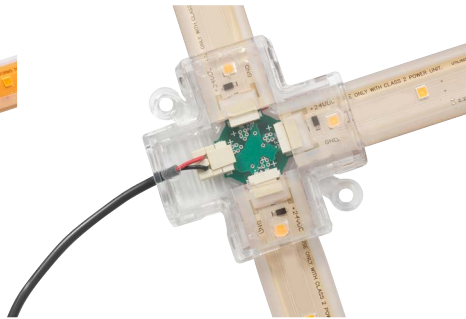

IP67 Rated Connectors (SLW Series)

A translucent silicone gel is included inside SLW Series clear acrylic enclosures that repels moisture – without inhibiting the light. These easy to install connectors allow the IP67 rating to be maintained when Juno FlexConnect™ strips are cut in the field.

4-Way Connector – Accepts four luminaire strips or three strips and one power feed. Available in SL Series for indoor use or SLW Series for outdoor wet locations.

Terminal Block – Accepts 14-22 AWG wire, allowing power supply to be remotely mounted up to 100 feet away.

Mounting Options

Aluminum Channel and Lens Options

Channels are available in satin aluminum, white or black finishes. They can be ordered with clear or frosted lens, or be specified without a lens.

Low Profile Surface Mount

Deep Surface Mount

45° Low Profile

Mounting Clips – Provide secure attachment to a variety of surfaces when placed at 1-foot intervals. The back of luminaires features 3M adhesive strips to maintain positioning while installing clips.

45° Square

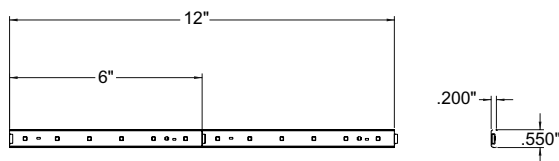

45° Round

Note: Except as indicated, all optional accessories are ordered separately.
